

Five wall display families. All five run the same TouchSource software, meet ADA requirements, carry a 2-year hardware warranty and are made in the USA — so the choice comes down to **how the display meets the wall**.

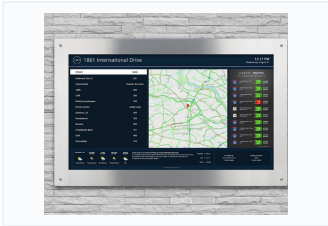

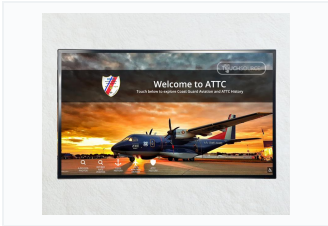

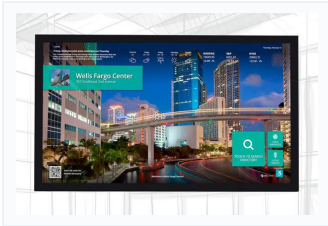

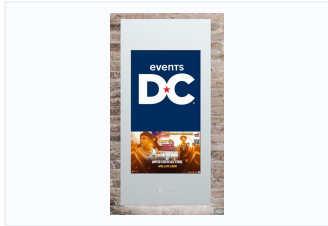

- 1 Indoor or outdoor?**

Exposed to weather → **Frontier**, the only weather-rated wall display. Everything else is indoor.
- 2 Can you open the wall?**

Yes, and you want a flush finish → **Mirada**. No, or it's a retrofit → **Pantella**, **Keystone** or **Crestone**.
- 3 Is a metal cabinet part of the look?**

Yes, framed and finished → **Pantella** or **Mirada**. No, screen-forward → **Keystone** or **Crestone**.
- 4 How many listings?**

Size follows tenant count: 22" holds about 25–30, 75" about 180–200. Size to the directory, not the wall.

					
	Pantella™ SURFACE-MOUNTED	Mirada™ RECESSED	Keystone™ SLIMLINE	Crestone™ SLIM FRAME	Frontier™ OUTDOOR
Mounting	Surface-mounted enclosure on a finished wall	Fully recessed into the wall; retrofit back boxes for tight cavities	TouchSource Display Mounting System — no surrounding cabinet	Slim wall mount for alcoves, hallways and tight spaces	Surface-mounted, heavy-gauge outdoor enclosure

Hardware specifications are subject to change — call for the most current information. Listing counts vary between touch and static and between horizontal and vertical alignment; the number you can display depends on your design choice. Note: the Pantella vertical cabinet is not listed at 75" — confirm availability before quoting.
